EMD GP30: Locomotive Roster

<http://crcyc.railfan.net/>

Updated: 12-21-03

Conrail inherited their fleet of 250 2,200hp GP30's from the Reading Company and the Penn Central, which inherited their units from the Pennsylvania Railroad and New York Central. Conrail assigned these locomotives to the series CR 2100-2249. Conrail's GP30's experienced a confusing life of being retired, stored, reactivated, stored, and so on during the 1980s, until the final units were retired in the early 1990s.

The roster below is comprehensive for these units between April 1976 and the last unit's retirement in the early 1990s, and contains all predecessor units of the locomotive class that Conrail inherited. If numbers are missing from the roster, Conrail intentionally left them open. It does not contain retirement dates and dispositions due to their complex nature. If you're interested in dispositions and retirements, see Railspot.com, which attempts to track such information for various railroads and locomotives. All of the units were retired prior to June 1999. If you happen to spot an error in the roster or have additional information, please contact me.
