EMD SD38: Locomotive Roster

Updated: 9-2-16

The SD38 was not one of the most popular road switchers that EMD produced during the late 1960s and into the early 1970s. In April 1970 Penn Central received 35 units from EMD (PC 6925-6959), nearly half of all SD38's produced. In 1976 all 35 locomotives were passed onto Conrail (CR 6925-6959) and the fleet remained intact until 1999. EMD designed the SD38 as a slow-speed, short-distance locomotive for heavy haul service.

They were locomotives best suited to the slow, heavy work of hump or yard service.
