EMD SD40: Renumbering Locomotive Roster

<http://crcyc.railfan.net/>

Updated: 12-16-03

During the early 1990s, Conrail began receiving new C40-8W's, placing them in the 6200 series. Since some SD40's that had not been rebuilt or sold off still remained on roster, they were temporarily renumbered. Units that had been stored inoperable at the time, even though many were later reactivated, were renumbered into the 600 series. These units apparently remained on Conrail property until late 1994, then they were shipped to Helm Leasing. Those units that were active or operable, on the other hand, were renumbered into the 800

series. Several units in the 800 series were prefixed with "0" to either avoid confusion with Amtrak's 800-series F40's or to comply with Conrail's computer system, which was accustomed to 4-digit road numbers. CR 807 never had a locomotive assigned to it, therefore it does not appear on the roster.

CR	Former	Prior	Previous	Built	Retired	Disposition	Notes
600	CR 6344	PC 6091	PRR 6191	03/66	07/93	to HLCX	5015
