EMD SD40: Comprehensive Locomotive Roster

<http://crcyc.railfan.net/>

Updated: 9-2-16

By 1976, production on the 3,000hp SD40 had been replaced with the upgraded Dash 2 series. Conrail inherited its entire SD40 fleet from the Jersey Central and Penn Central. Some units remained under standard Conrail paint and numbering, while others were repainted, renumbered, and then placed into lease service. The rosters below help to relieve some of this confusion.

The roster below is comprehensive for Conrail's regular fleet of SD40's they inherited on April 1, 1976. This roster is a compilation of information from *A Colorful Look At Conrail's SD40 and SD40-2's* and *CR Locomotive Data* books. Thanks to Dave Goldsmith, Jr, for disposition information.
