EMD SD40-2R: Locomotive Roster

<http://crcyc.railfan.net/>

Updated: 9-2-16

Conrail so loved their SD40-2's that in 1993 they decided to rebuild 40 units to 'Dash 2' specifications. For this project Conrail chose 30 of their own units and purchased an additional 10 former-Kansas City Southern SD40's from PAC Rail leasing. Conrail placed these rebuilt SD40-2R's into the series CR 6960-6999. While Conrail made no attempt to standardize the external appearance of their SD40-2R's, there are some common features. For example, all SD40-2R's retain their SD40 long hood and frame. The hood lacks a sight glass and pilot anticlimbers, both of which are present on the

SD40-2. All SD40-2R's are equipped with FRA-approved marker lights, a tube-like affair that shines a red beam directly down the track instead of outward along the angle of the hood ends. But the similarities among units end there. Some units went to NS first and then were transferred to CSX as their second disposition.

Unit #	Reblt	Former	Prior	Previous	Built #	Removed	Fist Disposition
CR 6960	??/93	CR 6259	PC 6259	---	12/70 36915	05/31/99	to CSX 8869
