## EMD SD40-2R: Locomotive Roster

<http://crcyc.railfan.net/>

Updated: 12-18-03

In 1993 Conrail began rebuilding 40 SD40's to the improved EMD 'dash 2' specifications. They chose 30 of their own units--former Penn Central and Central Railroad of New Jersey locomotives--as well as 10 units they purchased from PAC Rail Leasing, which had purchased the units from Kansas City Southern. If all of this confuses you, the roster below should be of some help.

The roster below is comprehensive for these units, which were rebuilt from SD40's beginning in 1993 and survived on roster until 1999. The roster does not contain retirement dates and dispositions, though if you are interested in such information and how CSX and NS renumbered the units in 1999, then see Railspot.com, which attempts to track such information for various railroads and locomotives. This roster based on information from *A Colorful Look At Conrail's SD40 and SD40-2's* and CR Locomotive Data books. If you happen to spot an error in the roster or have additional information, please contact me.

CR	Blt	Former	Prior	Previous
6960	1993	CR 6259	PC 6259	---
